Houston's office market was unquestionably dynamic at the start of 2020, and the onset of the pandemic accelerated change. With some of the highest vacancy rates and lowest rent growth rates in the country, silver linings may have appeared elusive at first glance.

But bright spots abound — including leasing in, and development of, high-quality, well-located office buildings in Houston's urban core and top suburban submarkets, investment in opportunistic plays, and burgeoning new industries.

While the energy industry faces significant challenges, Houston's office market and its economy continue to offer up some intriguing opportunities in the face of otherwise substantial headwinds.

In looking at Houston's office market, one might see

some negative trends — nation-topping vacancies, some of the biggest rent declines in the country, and flat or negative demand in each of the past four years.

After all, there is still a massive overhang of new supply. As of this update, there were more than 100 buildings with over 100,000 SF of contiguous space.

Yet there are some bright spots. Well-capitalized local companies and multinationals looking to differentiate their workplace experience continue to eye unique and high-quality office buildings for leasing and investment in a post-COVID world.

Looking ahead, a wholesale return of office workers to office buildings — and sustained leasing activity — depends on the success of vaccination and COVID-19 containment efforts.

#### **KEY INDICATORS**

Leasing volumes were down more than a third in 2020 compared with 2019, as tenants delayed leasing decisions during the pandemic. The energy industry — which accounts for approximately 30%-40% of Houston's GDP and an outsized share of its office occupancy — already faced significant challenges prior to the pandemic.

Houston's office market experienced -4.6 million SF of net absorption in 2020 — across all asset classes, which was the worst year on record, and more than double the move-outs during the worst of the shale bust in 2017. And a vacancy rate of 18.7% today is among the highest out of all 390 markets that CoStar tracks. Surprisingly, though, there were seven U.S. office markets that saw more negative absorption last year than Houston. This is likely since Houston had already corrected before the rest of the country had a chance to. The San Francisco Bay Area and all the coastal gateway markets were particularly hard-hit, as were hot inland markets such as Dallas-Fort Worth and Denver.

CoStar forecasts that Houston's office vacancy rate will peak just north of 18% in 2021 before beginning a modest recovery. And while the forecast positive net absorption in each of the next five years, there is still considerable uncertainty related to the pandemic. The success of vaccination efforts and the economic recovery will determine whether the rebound in tenant optimism and jump in leasing activity at the end of last year can be sustained through 2021 and beyond.

On a positive note, Houston did not see the increase in sublease space that other markets experienced last year, although the nominal increase from 19Q4-20Q4 did make the top 20 in the U.S. That is likely because much of the sublease space that went on the market during the shale bust was either converted to direct vacancy or absorbed.

Global oil and gas demand crashed last year during the pandemic, as global travel largely froze — leading to negative oil prices for the first time in the industry's history. Although the U.S. rig count started to rebound slightly in early 2021, it remains in historically low territory. U.S. oil prices also rebounded to the low-\$60s/barrel by 21Q1, yet these, too, are still prohibitively low for most E&P companies to drill profitably. More than 1 in 3 energy jobs in Houston was lost in 2020 — adding injury to a market that recently endured the shale bust of 2015 to 2017. Wall Street, frustrated by low oil prices and lackluster earnings over the past several years, had

also begun to pull the plug on investing in U.S. shale drillers in 2019. Yet Houston overall only lost 4.4% of its employment base last year — outperforming the U.S., which lost 6%.

The energy industry's issues may also be exacerbated by the new administration's policy of phasing out fossil fuels in support of the green energy transition. We will continue to monitor how these policy shifts continue to play out. Yet there is also significant public/private support in Houston for the city leading the way on alternative energy — given the existing skills base and resources.

Apart from Western Midstream Partners, three of the largest leases last year were non-energy companies.

JP Morgan will return to its former namesake tower, where owners Hines and Cerberus Capital are investing significant capital in renovating the lobby and common areas to enhance the competitiveness of 600 Travis.

Global law firm Norton Rose Fulbright will anchor Skanska's new 1550 on the Green office building in its Discovery West mixed-use development. Skanska was encouraged to develop a new tower in downtown Houston given that the Bank of America Tower it delivered in downtown in 2019 is already 90% leased. Skanska then sold a 90% stake in the tower to Beacon Capital Partners in late 2019 for \$530/SF — a record in Houston for a nonmedical office building. While Houston has the highest office vacancy rate in the country out of all 390 markets that CoStar tracks, downtown Houston office buildings built since 2016 are 95% occupied. That includes more than 2.4 million SF of new space.

Western Midstream Partners, a pipeline company, backfilled several floors of former Anadarko space that was vacated as part of its 2019 acquisition by Occidental Petroleum.

And fast-growing online used car dealer Vroom leased more than 100,000 SF at Westchase Park in 21Q1.

The largest move-in last year involved Harris Health System occupying 305,000 SF at the former Chevron building in Bellaire. This move followed Methodist Health System backfilling 100,000 SF at the building in March 2020. In doing so, SLS, which purchased the property from Chevron in 2018, proved the concept of converting corporate office buildings in Bellaire — which is located close to the Texas Medical Center — into health care

uses.

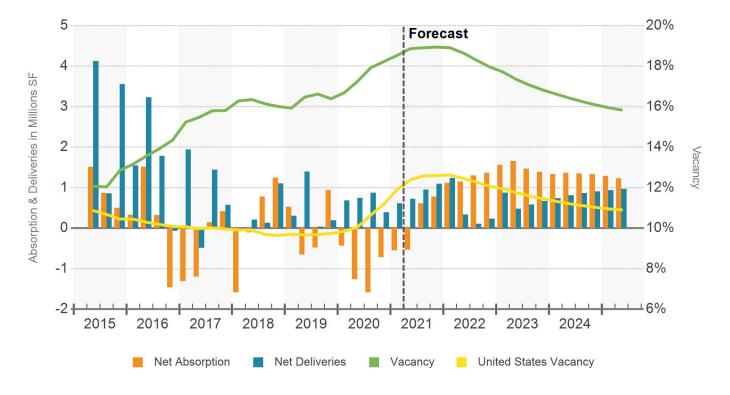

Additionally, Waste Management relocated into 285,000 SF at the new Bank of America Tower in downtown Houston.

Yet move-outs last year clearly exceeded positive absorption activity. There were eight companies that vacated over 80,000 SF each since July. Among the largest, Waste Management vacated 330,000 SF in the second half of 2020 across two buildings — One City Centre and 1001 Fannin. This was part of its move to the

new Bank of America Tower downtown. As part of the consolidation, Waste Management vacated a net of 45,000 SF in downtown Houston.

BHP Billiton Petroleum, which sold its U.S. unconventional assets to BP in 2018, vacated 230,000 SF at 1500 Post Oak — even though the company retained its conventional oil and gas business. More than half of BHP's sublease space was backfilled by tenants such as Sempra LNG and Summit Discovery Resources, a subsidiary of the Sumitomo Corporation.

Renewal

Though Houston ranked near the bottom of U.S. markets in terms of rent growth last year, the market was not nearly as negatively impacted as others such as the San Francisco Bay Area.

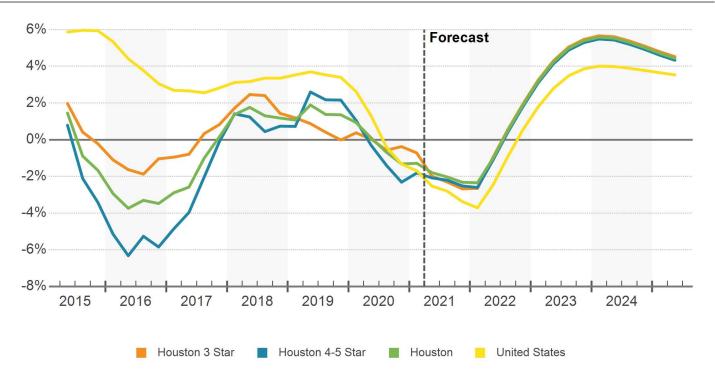

Houston office rents have stagnated since oil prices crashed in late 2014 and have yet to return to their recent peak. In Houston, office asking rents are highly correlated with oil price volatility. And oil prices have traded in a narrow and lower band over the past six years.

Rents have also trended down in each of the past three local economic cycles — not a great sign for Houston landlords, as owners have had to contend with successive supply waves and waning energy tenant demand.

The submarkets that are seeing positive rent growth are typically smaller submarkets that have not experienced much new supply or large-scale move-outs. Alternatively, the submarkets seeing the biggest rent declines are mostly the larger, institutional submarkets that have seen a recent wave of new supply and large move-outs, with few exceptions. Generous concession packages are also accompanying the rent discounts for tenants willing to make large commitments right now.

And while the rise in sublet space hasn't been as dire as some other metros, in some cases the spread in sublet versus direct rents could help underscore the added pressure sublet is putting on rent. In at least one downtown tower, sublet space was being offered at a 20% discount to directly available space.

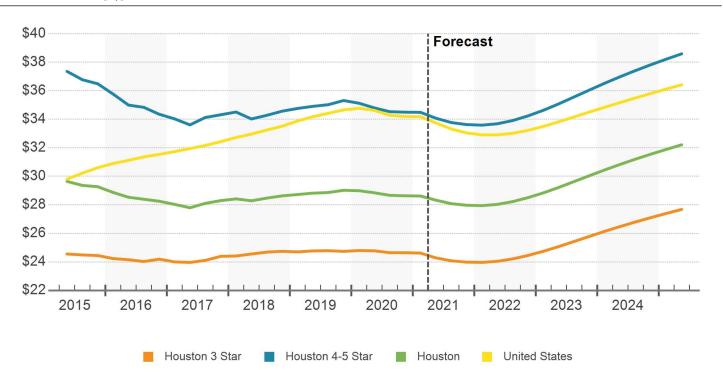

#### **MARKET RENT GROWTH (YOY)**

Expenses are estimated using NCREIF, Trepp, IREM, and CoStar data using the narrowest possible geographical definition from Zip Code to region.

Along with slower than normal leasing, the Houston market still has a sizable construction pipeline to contend with. Today there is 5.5 millionSF under construction.

Much of the new construction is concentrated in three submarkets: the CBD, South Main/Medical Center, and Katy Freeway East. Overall, new development activity is down considerably from 2014 highs — less than a third of that level. And between Texas Tower, Marathon Tower, and the Ion, homegrown global real estate firm Hines is responsible for a third of the new office development currently under construction in Houston.

Hines' 1.1 million-SF Texas Tower is expected to deliver by the end of 2021. This, and Lovett Commercial's mixed-use renovation of the downtown post office, comprise all the new development in that submarket.

Texas A&M and partner Medistar are under construction with the 510,000-SF Horizon Tower — a state-of-the-art life sciences building — located in the Texas Medical Center. This joins the 430,000-SF O'Quinn Medical Tower at the new McNair Baylor St. Lukes Campus, as two of the largest new developments in the medical center.

Hines is also developing a build-to-suit for Marathon Oil in City Centre. Upon completion, Marathon will relocate from 5555 San Felipe in the Galleria/Uptown Submarket.

And Hines is also redeveloping a former Sears flagship store in Midtown into the Ion tech hub in partnership with Rice University, which owns the building, and Station Houston, a startup accelerator that was recently acquired by Austin-based Capital Factory. It was recently announced that Microsoft, Chevron, and coworking provider Common Desk would serve as the building's anchor tenants. The Ion, which is expected to deliver in 21Q1, is part of Rice Management Company's 10-acre "South Main Innovation District" master plan for a forward-looking tech hub in the heart of Houston's urban corridor.

Houston's office supply pipeline was already down significantly since the recent oil downturn of 2015–17 as the market worked through significant oversupply, prior to

the coronavirus pandemic and recent oil price crash. However, there are still a few new projects underway.

Houston, home to the largest medical center in the world at the Texas Medical Center, may also soon welcome several million SF of new life science-oriented mixed-use projects along a 2-mile stretch of Holcombe Boulevard. These projects could raise Houston's profile as a burgeoning commercial life sciences and tech hub and could inject billions into the local economy.

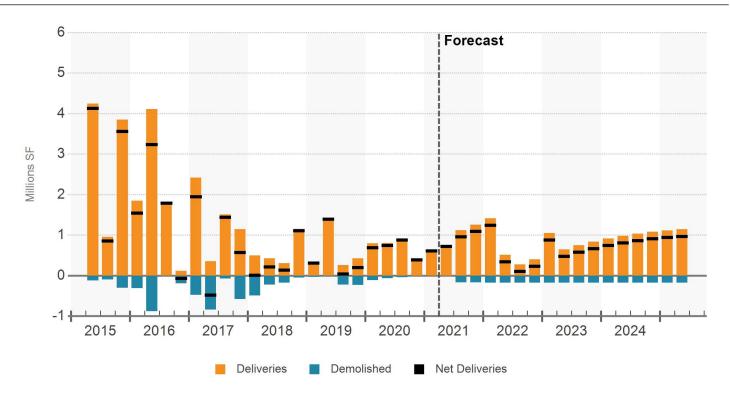

Among the proposed life sciences mixed-use projects, Hines and 2ML Real Estate Interests (the Levit family of Grocers Supply Company) recently announced the proposed development of a 52-acre mixed-use project at the intersection of Holcombe Boulevard and Highway 288. The project, which will be dubbed Levit Green, will sit on the site of a former Grocers Supply distribution facility. The project is slated to primarily serve a growing demand for life sciences lab and research facilities. The development is also slated to include multifamily and retail. The project could break ground within the next two years and has been in the concept stage for at least three.

Medistar also has plans for another large mixed-use project at the intersection of Holcome Boulevard and Main Street dubbed the Innovation Tower. Initial plans call for a 50-story, 1.7 million-SF tower with 550,000 SF of medical, clinical, biomedical, and corporate office, dry lab, tech, and collaborative space, as well as 410 luxury apartments and retail and dining amenities. It would also connect to Medistar's recently completed 35-story LATITUDE Med Center apartment tower and 22-story Intercontinental Houston - Medical Center Hotel.

And the TMC|3 project, which is scheduled to break ground in late 2020, is planned to include 250,000 SF of core labs and amenities, including 138,000 SF of commercial and retail space and 112,000 SF of shared research facilities. Development plans also call for a 410-room TMC Hotel and Conference Center and 50,000 SF of conference space. In all, the site totals 36 acres. Transwestern Development Company is managing the development of the project.

Following 19Q4, which was one of the best quarters on record for transaction volume in Houston, transaction activity plummeted in 2020 during the pandemic. The fourth quarter of 2020 saw investors stage a modest yet otherwise unremarkable comeback in transaction volume. However, annual transaction volume had fallen by more than half from the prior year's level. Yet this was still enough to rank Houston in the top 15 markets by sales volume in 2020.

Among the largest deals last year, Solana Beach, California-based Brixton Capital acquired a four-property portfolio at the Dow Texas Innovation Center in Lake Jackson in November. The seller was New York-based Lexington Realty Trust. The campus, which was developed by locally based CORE Real Estate with partner Lexington in 2016, is fully leased to Dow Chemical. In 2017, the Administration Building on the campus was sold to Cole Office & Industrial REIT for \$260 per square foot. Thus, this sale represents a nearly \$30/SF increase over the past three years.

And a partnership between locally based Triten Real Estate Partners and New York-based Taconic Capital Advisors acquired 1111 Fannin in downtown Houston in November. JPMorgan's lease expires in September 2021, at which point it will relocate to 600 Travis. The buyers stated that they decided to acquire the property because it was offered well below replacement cost. which could be nearly double the estimated sales price. Combined with opportunity zone tax incentives, it provided an attractive redevelopment opportunity in one of the nation's key submarkets. The acquisition represents a vote of confidence in downtown Houston, which has seen rising vacancies in recent years. Brookfield, Hines, and other landlords have poured hundreds of millions of dollars in recent years into redeveloping older-vintage office buildings downtown in a bid to retain and attract tenants there at attractive rental rates.

In 2020, local buyers made up half of the square footage sold vs. one quarter for national buyers, as outside capital took more of a backseat during the pandemic. In 2019, that ratio was flipped, and in both years foreign buyers made up just shy of 10%. For confirmed trades, cap rates held steady year over year, compressing by 30 basis points. And average sales price per square foot also held steady around \$200. The most significant trophy deal to occur prior to the onset of the pandemic in 2020 involved Midway Companies' sale of the 250,000-SF office tower at Kirby Grove for \$115 million, or \$464/SF,

to Chicago-based DWS. The sale included a ground lease, which is owned by the Upper Kirby Redevelopment Authority of the City of Houston. The 5 Star, LEED-certified building within Midway's Kirby Grove mixed-use development delivered in 2015 and was 96% occupied at the time of sale.

Notably, in April 2020, trophy asset 609 Main fell out of contract for undisclosed reasons with a prospective buying group that included KB Securities, a Korean investment firm and subsidiary of KB Financial, which was advised by South Korean asset management firm JR AMC. A joint venture between Hines and the California Public Employees Retirement System (CalPERS) listed 609 Main on the market last fall. It's unclear if the building is still for sale and if the sellers are pursuing backup buyers. However, Hines and CalPERS recently succeeded in pushing back the maturity date of a \$230 million construction loan tied to the property from March 25 to September 25. Prior to the coronavirus pandemic, 609 Main was slated to possibly set a per-SF price record for Houston non-medical office. The building is 95% leased to a variety of legal, financial, real estate, and business services tenants, with United Airlines as an anchor, and it is significantly underexposed to upstream energy.

Since 2010, Houston has been considered attractive to investors because, in addition to being the fifth-largest metropolitan area in the U.S., it was one of the fastest-growing for several years prior to the oil downturn of 2015-17 in terms of total job and population growth, regularly ranking among a small cohort of cities such as Dallas-Fort Worth and New York. Population growth continued to top the nation, even during the 2015-17 oil downturn and Hurricane Harvey in 2017. And in 2018-19, Houston's energy industry mounted enough of a recovery to again return Houston to the top of the job and population growth rankings.

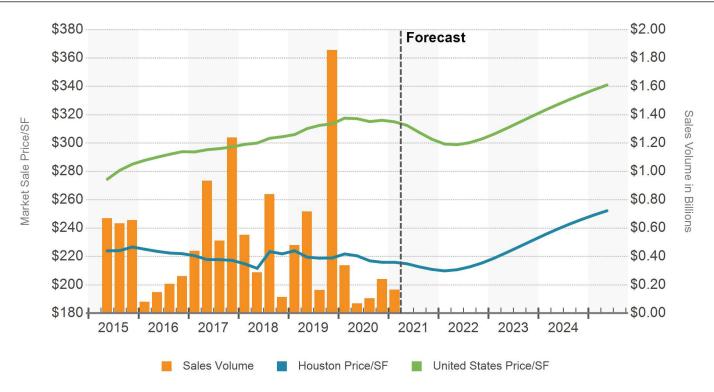

However, Houston's office sector vacancy never quite recovered from the oil downturn of 2015-17. This has placed downward pressure on rents, and therefore NOI and prices and slightly increased pressure on cap rates ever since 2014. As a result, a mix of private equity, private, REIT/public, and institutional investors swooped in over the past four years to capitalize on value-add and opportunistic plays where they could find them, especially portfolio deals of older 4 Star assets in core and core plus locations. Whereas the early years of the shale oil boom, from 2011-13, saw significant REIT/public investment, private equity investors have

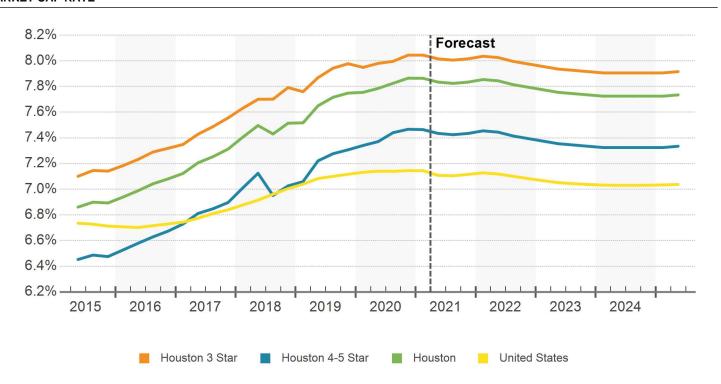

been more active since 2017.

Houston will continue to feel the impact of the coronavirus pandemic on its economy, and the metro is still on the road to recovery. Houston employment fell by more than 360,000 jobs from February to April 2020, surpassing the job losses from the '80s oil bust (+226,000) and the Great Recession (+120,000). As a result, the unemployment rate jumped to more than 14% in April 2020. Through February, the market has added back only about a third of those lost jobs. The unemployment rate remains stubbornly high — at above 8% — and significantly above the 3.8% seen during February 2020. The recovery depends on an improving health situation, and the baseline forecast anticipates that employment will return to pre-pandemic levels by mid-2022.

The Houston metropolitan area is the fifth largest in the U.S. and prior to the pandemic consistently ranked among the top metros for job growth in the country. Ample job opportunities had spurred significant population growth and more than 1.1 million new residents were added from 2010 to 2019. Only Dallas-Fort Worth and Phoenix bested the Houston metropolitan area in terms of population growth in 2019. And in terms of counties, Houston's Harris County had the secondlargest population increase over the first nine years of the decade, adding more than 620,000 people, trailing only Phoenix's Maricopa County. The Houston metropolitan added an estimated 89,994 new residents. 58% due to the natural increase (births minus deaths), 34% due to international migration, and 8% due to domestic migration, according to U.S. Census Bureau data. Since 2000, Houston has added an impressive 2.3 million residents, equal to the size of Austin. Houston also has one of the youngest populations in the nation. U.S. Census Bureau data shows that Houston's median age is 33 years old, compared with the U.S. median age of 38.

For Houston, lower crude oil prices pile on another layer

of economic uncertainty for its exploration, production, and oil field services companies, the region's largest employers. Oil and gas companies cut more than 60% of capex spending this past year. On April 20th, oil prices fell as low as negative \$40/barrel—the first time oil prices have turned negative—due to storage fears in the U.S. Since then, though, oil prices have recovered, somewhat, to the low-\$60s/barrel.

Fortunately, Houston has shifted away from being solely an oil and gas city and persistently continues to diversify its economy in industries like the life sciences (it is home to the world's largest medical center), giving the city a bit of a cushion. Houston's public and private sectors today are united in the goal of growing its global life sciences profile. At the center of these blue ocean projects are two key real estate developments in the works to encourage growth in these sectors: The Ion and TMC3. Rice University is transforming a 270,000-SF former Sears department store in Houston's Midtown neighborhood into The Ion, the hub of a proposed 16-acre innovation district that the mayor hopes will boost the city's technological appeal. California-based energy giant Chevron Corp. is the first company to sign a lease in The Ion. And the TMC3 project was officially announced in April 2018 as the cornerstone of the Texas Medical Center's plan to establish Texas as the "Third Coast" for life sciences and biotechnology research to compete directly with Cambridge, Massachusetts, and Mission Bay in San Francisco. TMC3 is expected to create roughly 26,000 jobs and generate \$5.2 billion in economic benefits in Houston. In addition, there are several million SF of new life sciences-oriented mixeduse projects planned along a two-mile stretch of Holcombe Boulevard in the Texas Medical Center.

Owing to its affordability, warm climate, low taxes, and pro-business environment, Houston, like many major Sun Belt cities, is well-positioned for future growth and remains resilient.
